

For centuries, thriving communities have built pavillions to bring their members together. Typically erected in the heart of the community, such places allow people to connect, collaborate and care for each other as a way of helping one another grow.

We aim to help people with disabilities lead a meaningful life both in their homes and while integrating into the community. This requires a common space for them to come together with those who empower them – a Pavillion for the HCBS world. **We call it...**

pavillio

pavillio

webinar: exclusive
platform preview

with Praba Manivasager

meet our speaker:
Praba Manivasager
President of Cashé Software

what you will get out of this webinar:

1. See a true end-to-end platform in action.
2. Understand how the platform was built around the person served.
3. Learn how Pavillio *thinks* for you.

before we dive in...
let's take a step back

The current Cashe platform was built to
serve one function:

billing

things have changed

*what we currently have no longer serves
the needs of today's agencies*

18 months ago we started this project
to **re-imagine** what a platform
should be.

our guiding principles

philosophical

serve people

improve quality of life

empathy for the user

setting a new standard

technical

no user manual required

automate and streamline business

adaptable for changing requirements

infinitely scalable

with these ideas in mind

pavillio

was born

so, what is pavillio?

For agencies: all-in-one technology solution to run your business

For caregivers: less paperwork and more time to serve

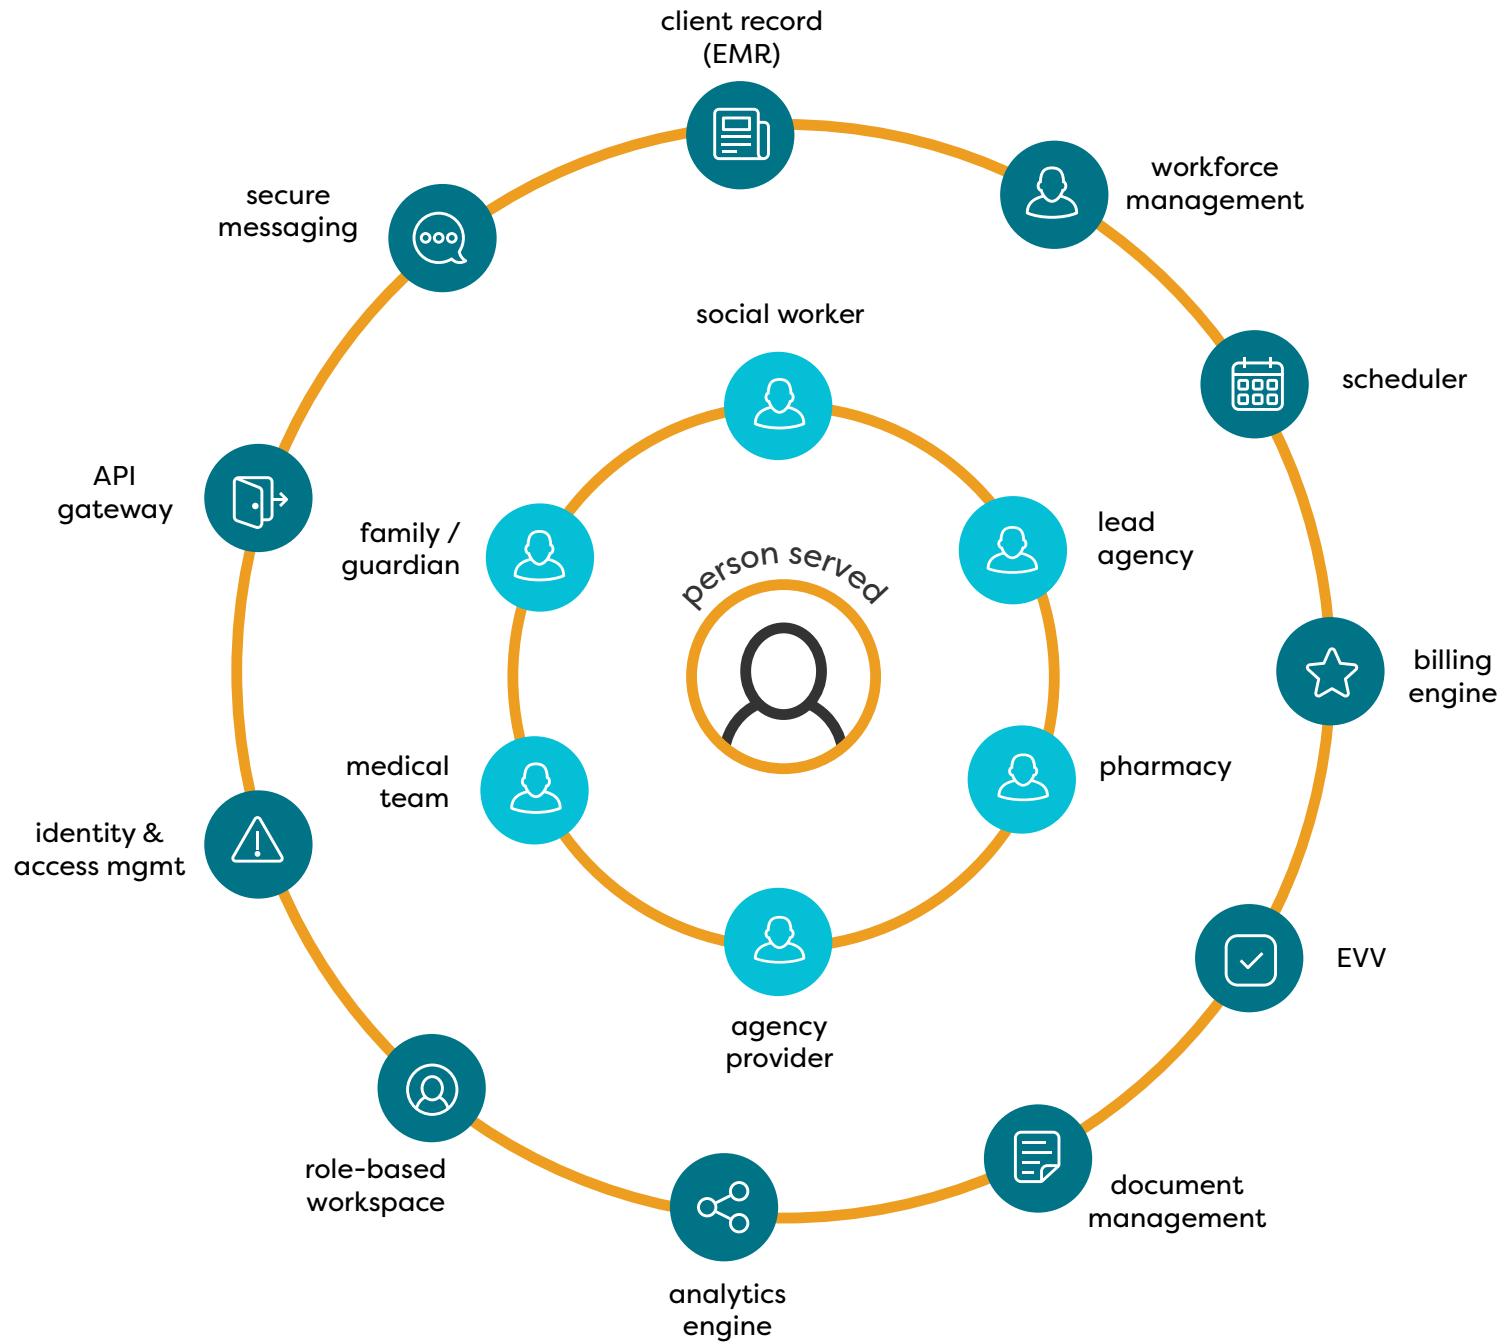

For care recipients: remain at the center of everything

person centered:
at the center of the pavillion is
the person being served

let's see what these tools
actually look like

*and how they enable your agency to
provide person-centered care*

platform highlights

SA automation
continuous billing
personalization

preference matching
document management
enforced workflow

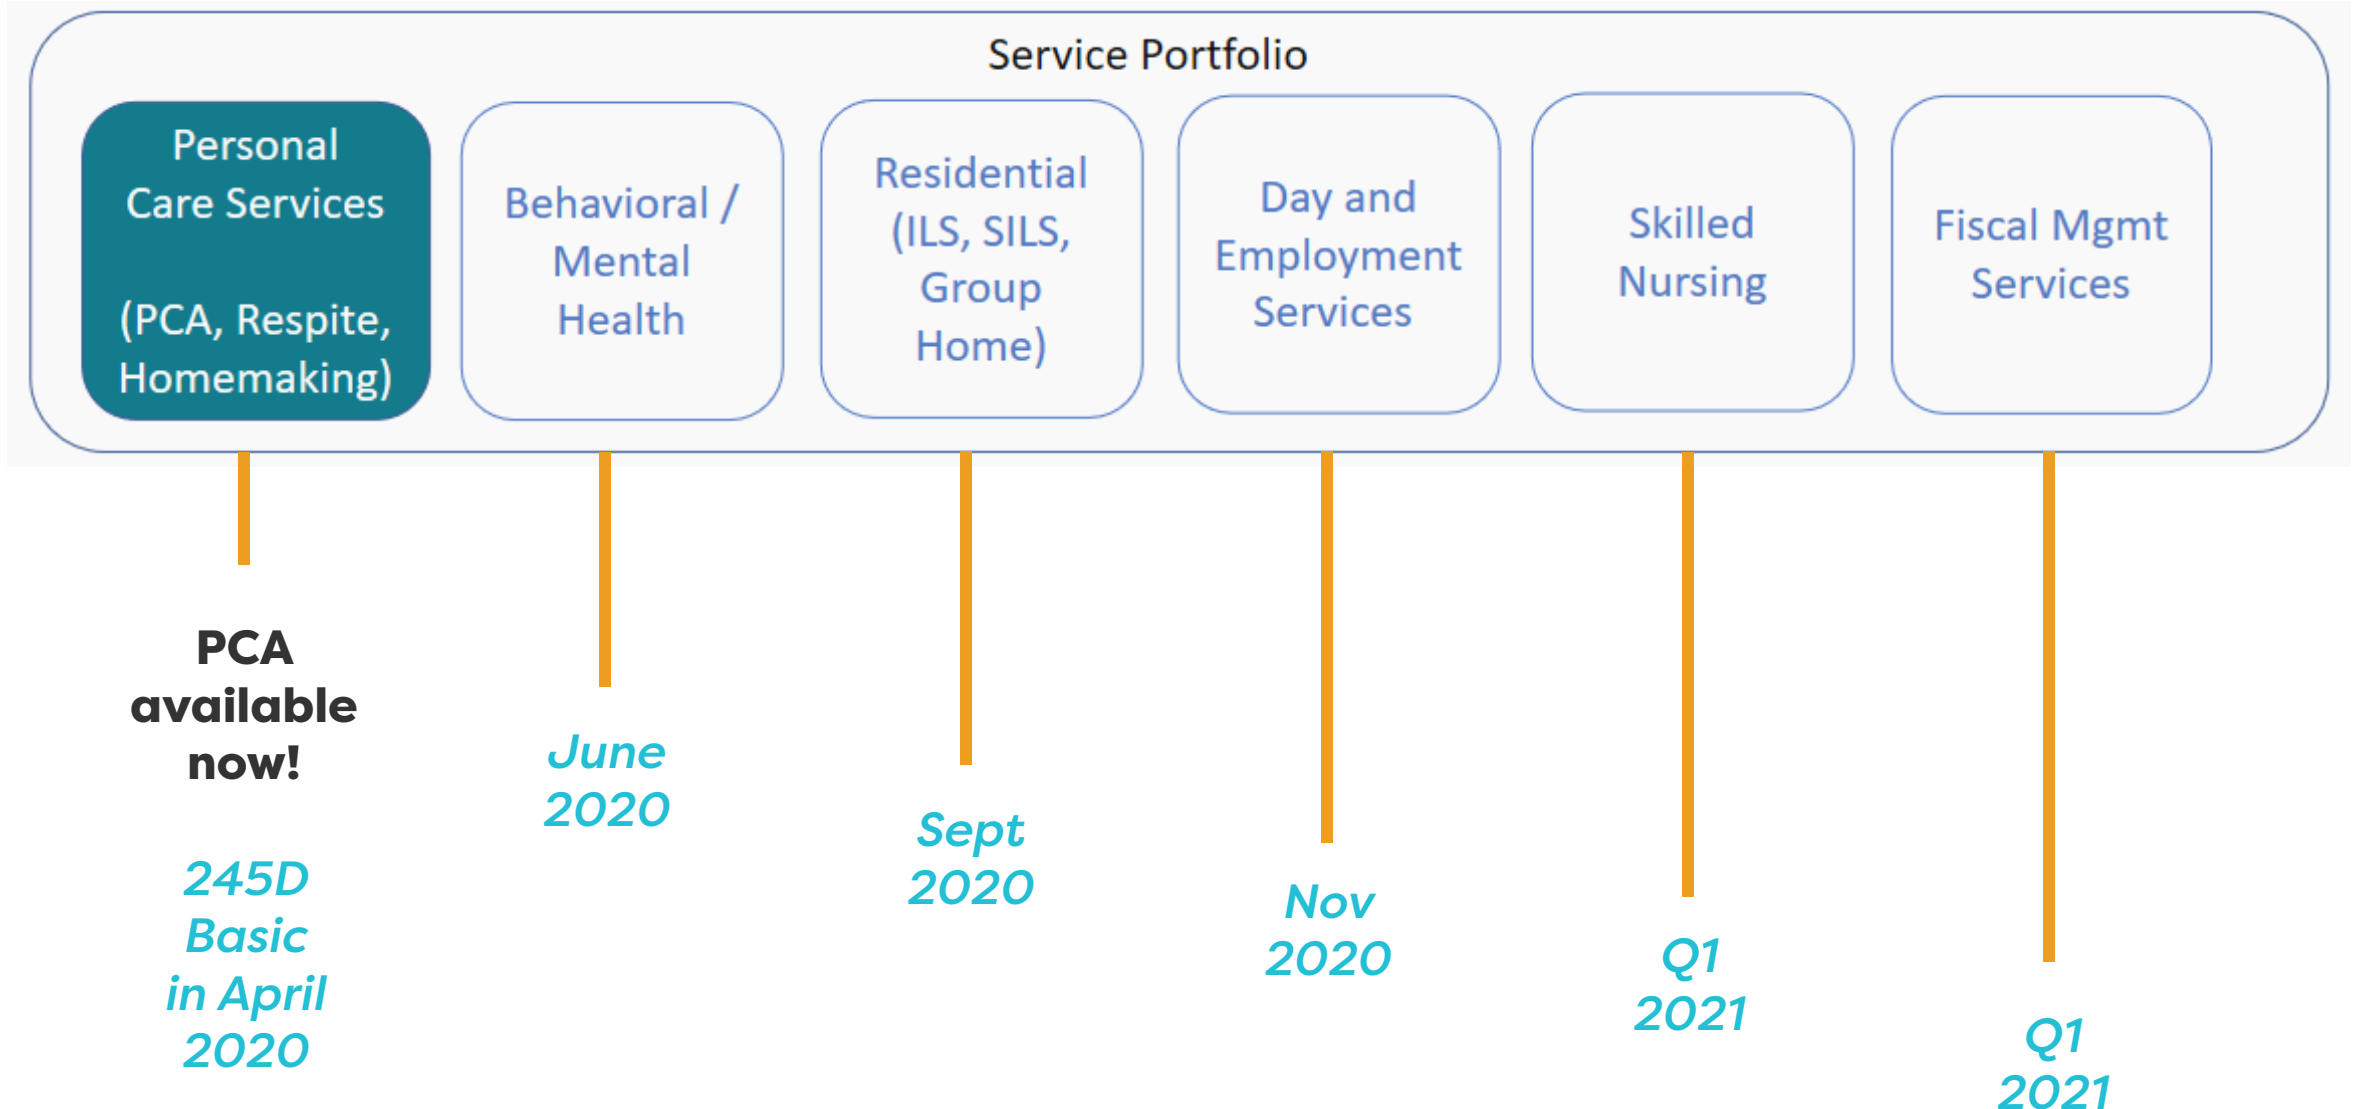

now you have seen what a truly
end-to-end platform
centered around care
looks like.

let's talk

timelines

availability by service provided

**we are now available to take
questions**
